

PRESENTATION OF EXPERIENCES

The 18th International Congress of Educating Cities, under the slogan 'Education and culture in the city: community, critical thinking and creativity', will be a great opportunity to share best practices, based on the following themes:

- **Building the city/community in increasingly complex cities.**
- **The development of a critical and unrestrained/liberated citizenry to participate in building the future of cities.**
- **The development of a creative citizenry that generates new sensibilities, strategies and tools to face the challenges of their society.**

Experiences can be shared in three different ways:

Workshop

The workshop sessions will last 90 to 120 minutes and will bring together experiences grouped around the same theme. The presentation of each experience will last a maximum of 10 minutes per city.

This format will have simultaneous translation in Spanish, English, French and Portuguese (the availability of languages may vary depending on the number of people registered in each language).

Direct dialogue

In this format, presentations will last a maximum of 5 minutes per city and will be held in small groups.

The direct dialogue spaces will be supported by volunteer interpreting students.

Poster

The poster format offers the possibility of presenting experiences using smart screens, which will display basic information about the project in a visual format and can be consulted during a specific time slot (30 minutes per city), with the support of a local representative who will be available next to the screen to answer questions from anyone interested in the project.

Important information

- The experience submission form must be completed, regardless of the presentation format chosen.
- The experiences received will undergo an evaluation and selection process by the event's Scientific Committee.
- The presentation format will be indicated by the participating city at the time of submission, in a specific field on the form. After evaluating the experiences, the Scientific Committee may indicate that they be presented in a format (workshop, direct dialogue, poster) different from the one initially proposed.
- The formatting, size and template requirements for presentations in the different formats will be available at a later date.
- There will be certification for participants registered for the event and for those who make presentations in any of the proposed formats.

PERIOD FOR SUBMITTING EXPERIENCES

Experiences will be accepted between the 1st of August and the 9th of October 2025 and must be submitted using the form available on the website.

Experiences will be accepted in five languages: Catalan, Portuguese, Spanish, French or English.
